

National Hospice and Palliative Care Organization  
**QUALITY ALERT**

November 23, 2022

**TO:** NHPCO Provider and State Members  
**FROM:** NHPCO Quality Team  
**RE:** Care Compare November 2022 Refresh

**Summary at a Glance**

On November 23, 2022, publicly reported Hospice Item Set and CAHPS® Survey Family Caregiver Experience hospice quality data were refreshed on [Care Compare](#). Star ratings and claims-based measures were not updated with the November 2022 refresh.

Care Compare data refresh schedules for publicly reported measures are as follows:

- CAHPS® Hospice Survey Family Experience data – updated quarterly
  - Current quarters: Quarter 3-Quarter 4 2019 and Quarter 3 2020-Quarter 4 2021
- Hospice Item Set Comprehensive Assessment Measure at Admission – updated quarterly
  - Current quarters: Quarter 1 2021-Quarter 4 2021
- Star Ratings – updated every other quarter (every 6 months), next refresh February 2023
  - Current quarters: Quarter 2-Quarter 4 2019 and Quarter 3 2020-Quarter 3 2021
- Claims-Based Measures (Hospice Care Index and Hospice Visits in Last Days of Life) – updated annually, next refresh November 2023
  - Current quarters: Quarter 2-Quarter 4 2019 and Quarter 3 2020-Quarter 3 2021

More details can be found in the Quality Alert below.

On November 23, 2022, publicly reported hospice quality data was refreshed on the CMS website [Care Compare](#).

Care Compare is a website published by the Centers for Medicare and Medicaid Services (CMS) that allows members of the public to search for and compare healthcare providers, including hospice agencies. Quality data is collected from hospice claims, patient assessments, and caregiver satisfaction surveys and is publicly reported on a quarterly or annual basis. Details about data reporting periods for each current measure can be found below.

The following measures are published and available for public review and comparison:

### **Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Survey Family Experience Data**

- The CAHPS® Hospice Survey is a national survey of family members or friends who cared for a patient who died in hospice care. The CAHPS® survey is administered by hospice organizations via third-party vendors to caregivers after the death of their loved one.
- Publicly reported CAHPS® survey data updates quarterly. The November 2022 refresh includes CAHPS® data from Quarter 3-Quarter 4 2019 and Quarter 3 2020-Quarter 4 2021.
- Additional CAHPS® Resources
  - CAHPS Hospice Survey <https://www.hospicecahpsurvey.org/>
  - CMS Hospice Quality Reporting Program (HQRP) CAHPS Hospice Survey <https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Hospice-Quality-Reporting/CAHPS%C2%AE-Hospice-Survey>

### **Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Star Ratings**

- Hospices with 75 or more completed CAHPS surveys over the eight-quarter reporting period will receive a Star Rating on Care Compare. Prior to public reporting, CAHPS Hospice Survey results are adjusted for effects of mode of survey administration and case mix. Details with overview of the purpose, timeline, and methods as well as national and state Star Rating distribution reports can be found on the Hospice CAHPS survey website, linked below.
- Star Ratings are updated every other quarter, with the next update scheduled for the February 2023 Care Compare refresh. Care Compare currently includes data from Quarter 2-Quarter 4 2019 and Quarter 3 2020-Quarter 3 2021.
- Additional Star Rating Resources (including national and state distribution reports)
  - CAHPS Hospice Survey Star Ratings <https://www.hospicecahpsurvey.org/en/public-reporting/star-ratings/>
    - Includes national and state distribution reports and star rating calculation methods

### **Claims-Based Measures**

#### **Hospice Care Index (HCI)**

- The HCI is a single Medicare claims-based measure that captures care processes occurring throughout the hospice stay, between admission and discharge. Although the HCI is a single measure, it captures data from ten individual indicators. Each indicator has equal weight and hospices earn a point for each indicator in which they score above a national performance threshold, for a total possible HCI score between 0 and 10.
- The August 2022 refresh was the inaugural month for public reporting of the Hospice Care Index and Care Compare currently includes data from Quarter 2-Quarter 4 2019 and Quarter 3 2020-Quarter 3 2021. Publicly reported HCI data will refresh annually, with the next anticipated refresh in November 2023.

  - Abt Associates. Hospice Care Index Technical Report <https://www.cms.gov/files/document/hospice-care-index-hci-technical-reportjuly-2022.pdf>

### **Hospice Visits in the Last Days of Life (HVLDL)**

- HVLDL measures the proportion of hospice patients who received in-person visits from a registered nurse or a medical social worker on at least two of the final three days of life. The August 2022 refresh was the inaugural month for public reporting of HVLDL, which replaced public reporting of Hospice Visits When Death is Imminent (HVWDII). HVLDL was endorsed by the National Quality Forum (NQF) as NQF #3645 on July 26, 2022.
- Care Compare currently includes HVLDL data from Quarter 2-Quarter 4 2019 and Quarter 3 2020-Quarter 3 2021. Publicly reported HVLDL data will refresh annually, with the next anticipated refresh in November 2023.

### **Hospice Item set (HIS) Comprehensive Assessment Measure at Admission**

- The HIS Comprehensive Assessment Measure at Admission is an NQF endorsed measure (NQF #3235) that captures, in one measure, the proportion of patients for whom the hospice performed seven care processes upon admission to hospice.
- The HIS Comprehensive Assessment Measure at Admission has been publicly reported since 2018. The November 2022 refresh includes HIS data from Quarter 1 2021-Quarter 4 2021.
